

GREEN PIPING ALTERNATIVE FITS HOTEL INSTALLATION TO A TEE

AQUATHERM ADVANTAGES

- The limited installation space was a non-issue thanks to the superior flow rate of Aquatherm's polypropylene (PP-R) pipe
- Cimatherm weighs up to 75% less than comparably sized metal pipes making the installation much easier
- The corrosion-resistant and leak-free PP-R pipe is engineered to last over 60 years

PROJECT	PRODUCTS USED	LOCATION/DATE
Arizona Republic Building	Climatherm®	Phoenix, AZ August 2011

THE CHALLENGE

The building, which houses the Arizona Republic news and local Channel 12 station, required a 4" main line and four 3" chilled lines to be run through a tight ceiling area to the server room

THE SOLUTION

About 300' of Aquatherm's Climatherm® pipe was installed to supply chilled water

"The installation lasted approximately two weeks. If this had been a steel pipe installation it would have been three to four weeks to cut and thread pipe this size and then deal with weight issues."

- JAY FARACI, OWNER OF METAL MASTERS MECHANICAL LLC
